

CPP Evaluation and Assessment Toolkit (CPP-EAT)
DRAFT – THIS IS STILL UNDER DEVELOPMENT

Note: Please note this toolkit is still under development. In the future we hope to have measure reviews for all instruments in the toolkit included either on nctsn.org/measures or in this toolkit. We are also looking into other options for free instruments that can be used to assess key CPP domains.

This toolkit contains instruments that are recommended for use in CPP practice. Below we outline key CPP assessment domains and indicate which instruments are provided in the CPP Toolkit. All instruments recommended in this toolkit are available in English and Spanish

Key Domain & Instrument	Where to obtain	Measure Review
Child Trauma History		
Traumatic Events Screening Inventory Parent Report Revised (TESI-PRR)	CPP-EAT	TBD
Child Trauma Symptoms		
Trauma Symptom Checklist for Young Children (TSCYC)	http://www4.parinc.com/Products/Product.aspx?ProductID=TSCYC	Nctsn.org/measures http://www.nctsn.org/nctsn_assets/pdfs/measure/TSCYC.pdf
Posttraumatic Stress Responses in Infancy and Early Childhood	CPP-EAT (only English)	This is a new instrument with no psychometrics. We are currently piloting the instrument. It is a good training tool for helping clinicians to assess and understand PTSD
Child General Symptoms (depends on age)		
Child Developmental Functioning		
Caregiver Trauma History		
Life Stressors Checklist Revised (LSC-R)	CPP-EAT	TBD
Caregiver Trauma Symptoms		
PTSD Symptom Scale	CPP-EAT	TBD
Caregiver Depression		

Center for Epidemiologic Studies: Depression Scale (CES-D)	CPP-EAT	TBD
